

Local Setup Guide

Using docker

1. Install Docker: <https://docs.docker.com/engine/install/>
2. Pull Docker Image: `docker pull fenago/react-graphql-intro`
3. Start Lab Environment: `docker run -d --privileged --restart=always --user root -p 80:80 -p 81:81 -p 3000:3000 -p 8000:8000 -p 5900:5900 --name graphqlintro fenago/react-graphql-intro`

Optional:

- Restart Lab Environment:

```
docker restart graphqlintro
```

- Delete Lab Environment:

```
docker stop graphqlintro  
docker rm graphqlintro
```
